## CENTER OF GRAVITY

### Choose position of rear wheel axle plate:

Measure distance from front of back post to center of axle receiver.

Default setting is at 1 1/4"

| Most stable              |                          |                          |                          |                          |                          | Most responsive |  |
